PrashDevCode

Portfolio

Professional Summary

Results-driven Full Stack Developer with hands-on production experience building and scaling real-world web platforms. Proficient in RESTful API design, backend architecture, and frontend development using the MERN stack with a strong focus on performance, security, and clean code.

Work Experience

Sheryians Coding School

Dec 2025 – Present

Full Stack Developer

Bhopal, M.P.

- Developing and scaling a live hiring platform (hire.sheryians.com) serving real-world candidates and recruiters.
- Designed normalized MongoDB schemas using Mongoose ODM for consistent and scalable data modeling.
- Architected and deployed an automated certificate generation service, eliminating manual processing and enabling scalable distribution for large user batches.
- Integrated MongoDB for efficient data modeling and optimized query performance across production environments.
- Built modular REST APIs using Node.js and Express.js with structured MVC architecture for maintainable backend systems.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, RESTful API Design, MVC Architecture
Databases: MongoDB, MySQL (Schema Design, Query Optimization)
Tools: Git, GitHub, VS Code, Postman
Concepts: JWT Authentication, API Security, Async Programming

Projects

Jubilo – Celebration & Party Organizer

GitHub

- Built a full-stack event management platform enabling booking, decoration customization, and venue management workflows.
- Designed RESTful APIs using Node.js and Express.js to handle dynamic booking logic and user interactions.
- Implemented responsive UI using React.js and Tailwind CSS and deployed via Firebase and Vercel.
- Implemented JWT-based authentication and role-based authorization to secure protected routes.

Contact App – Full-Stack CRUD Contact Management System

GitHub

- Developed a production-ready RESTful Contact Management API using Node.js, Express.js, and MongoDB with full CRUD functionality.
- Engineered dynamic contact operations allowing users to create, read, update, and delete contacts via structured API endpoints.
- Implemented server-side pagination to handle large contact datasets and optimize query performance.
- Designed normalized MongoDB schemas using Mongoose ODM for consistent and scalable data modeling.

Skynexes – Production-Grade IT Services Platform (Ongoing)

GitHub

- Built scalable backend APIs using Node.js and Express.js.
- Designed MongoDB schemas for structured client-project workflows.
- Implemented role-based access control for secure system operations.
- Applied clean architectural patterns to ensure maintainable codebase.

Education

Bachelor of Technology – Computer Science

2022 – 2026

Technocrats Institute of Technology — CGPA: 8.08/10.0

Bhopal, M.P.

Higher Secondary Education

2020 – 2022

Rajkiya +2 High School

Arrah, Bihar

Certifications

ServiceNow Certified System Administrator (CSA)
