Work Experience

Software Developer VinraTech	Mar 2026 – Present Remote
- Engineered scalable web apps using React, Node.js, and TypeScript with modular backend architecture. - Built secure REST APIs and optimized MongoDB/MySQL queries to enhance server response times. - Implemented JWT authentication, role-based workflows, and collaborated via Agile/Git code reviews. Tech Stack: TypeScript, React, Node.js, Express, MySQL, MongoDB, REST APIs, Git	
Full Stack Developer Sheryians Pvt. Limited	Dec 2025 – Mar 2026 Bhopal, India
- Architected a live hiring platform using MCRS architecture serving active recruiters and candidates. - Built async BullMQ + Redis pipeline to automate PDF certificates, AWS S3 uploads, and Brevo emails. - Designed normalized MongoDB schemas and secure REST APIs with JWT, Joi, and Multer. Tech Stack: TypeScript, Node.js, Express, Next.js, MongoDB, Redis, AWS S3, BullMQ, Git	

Projects

Jubilo – Event Management Platform	GitHub Live
- Engineered a full-stack event management platform using Next.js 14 and Tailwind CSS, featuring dynamic booking, decoration customization, and venue workflows. - Integrated Cashfree Payments with automated notification pipelines (EmailJS), secured by iron-session, bcrypt, and role-based access control.	
SkyBlog – Blogging Platform & CMS	GitHub Live
- Built a full-stack blog platform with a dedicated admin panel for managing posts, users, and content, with image uploads via Multer and a responsive Tailwind CSS UI. - Implemented JWT-based authentication with bcrypt hashing, session handling via express-session, role-based access control, and transactional emails via Brevo SMTP.	
Contact App – RESTful Management System	GitHub Live
- Developed a production-ready RESTful Contact Management API using Node.js, Express.js, and MongoDB with full CRUD functionality. - Implemented server-side pagination and normalized MongoDB schemas using Mongoose ODM for scalable data modeling and optimized query performance.
