Career Objective

To begin my career in the IT industry by contributing to innovative projects and technology-driven initiatives while aligning with organizational goals. Committed to supporting process improvements, enhancing efficiency, and creating long-term value that fosters sustainable growth and organizational success.

EDUCATION

- Bachelor of Technology—Computer Science** 2022–2026
TECHNOCRATS INSTITUTE OF TECHNOLOGY – CSE; CGPA: 7.91/10.0
Bhopal, India
- Higher Secondary Education | BSEB** 2020–2022
RAJKIYA +2 HIGH SCHOOL
Arrah, Bihar
- Secondary Education | CBSE** 2019–2020
D.K CARMEL RES. HIGH SCHOOL
Arrah, Bihar

SKILLS

- Programming Languages:** Java, JavaScript
- Front-End:** HTML5, CSS3, React (basics), Bootstrap, Tailwind CSS
- Back-End / Frameworks:** Spring Boot learning
- Databases:** MySQL, SQL, Firebase
- Tools & Build:** VS Code, IntelliJ IDEA
- Version Control:** Git, GitHub
- Cloud / Hosting:** Firebase Hosting, Vercel
- Soft Skills:** Problem solving, teamwork, Work Ethic, Adaptability, Time Management, Leadership

PROJECTS

- Jubilo – Celebration & Party Organizer** [GitHub \(Deployed Link\)](#)
Jubilo is a comprehensive celebration and event management platform designed to make special moments seamless and memorable.
The platform integrates Airbnb-inspired and studio-style roomstay options with customized cakes, premium decorations, party planning, and venue booking — bringing every element of a celebration together in one place.
Tech Stack: Next.js, JavaScript, Reactjs, CSS, TailwindCSS, Firebase, Vercel
- Indian Online Voting System (IOVS)** [GitHub \(Deployed Link\)](#)
Developed a secure and user-friendly online voting platform aimed at digitizing the Indian electoral process. Implemented key features such as OTP-based login using Firebase, real-time vote counting with dynamic data visualization using charts, and a responsive UI with dark mode and modern animations. Focused on ensuring accessibility, transparency, and performance across devices.
Tech Stack: HTML, CSS, JavaScript, Firebase, React.js, Bootstrap.
- Student Management System** [GitHub \(Deployed Link\)](#)
Developed a console-based application using Core Java to manage student records. Implemented CRUD operations and search and update functionalities using OOP concepts and file handling.
Tech Stack: Core Java, OOP Concepts, File I/O, Collections Framework, Exception Handling

RELEVANT COURSEWORK

- Data Structures and Algorithms:** Packed with Excellent Implementation Skills. (Java >> JS)
- Object-Oriented Programming:** Strong grip on object-oriented languages and concepts. (JS, Java)
- Operating Systems Concepts:** Fully aware of the concepts of operating systems.
- Computer Networks:** Knowledge of OSI Model & Various Protocols (HTTP/S, TCP/IP, SSL, FTP, ARP, UDP, DHCP).
- Web Development:** Deep understanding of Web Design Rules and Frameworks.

CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA)
- Oracle Cloud Infrastructure 2024 Certified Foundations Associate

ACHIEVEMENTS

- Solved **500+** DSA questions on various platforms like **LeetCode**, **CodeChef**, and other coding platforms.
- Participated in SIH (Smart India Hackathon), where I and my team proposed an idea for a real-time problem.
